PROJECTS

Meeting Website – Video Conferencing Application | React HTML CSS Js WebRTC Socket.io jan 2026

- Developed a modern Zoom Clone web application using React.js to provide a seamless online meeting experience. The application allows users to create and join virtual meetings through an intuitive and responsive interface. It includes essential meeting features such as video and audio communication, microphone and camera controls, and reusable React components for better performance and maintainability. The project emphasizes responsive design, smooth user interaction, and an enhanced virtual collaboration experience across different devices..

Hospital Management System | Django, Python, HTML, CSS, JavaScript, Bootstrap, MySQL july 2026

- Developed a comprehensive Hospital Management System using Django to simplify hospital operations and improve patient services. The application provides an easy-to-use interface for patients to book appointments, explore hospital services, contact doctors, and access healthcare information. It includes secure data management, an AI chatbot for instant support. The project focuses on delivering an efficient, user-friendly, and reliable healthcare management solution. .

EXPERIENCE

CodeDais software private limited

june 2026 – july 30 2026

Django Developer Intern

Bhubaneswar, India

- Completed a Django Developer internship at CodeDais Software Pvt. Ltd., where I worked on developing and maintaining web applications using Django and Python. Collaborated with the development team to build responsive websites, implement backend functionality, integrate databases, and fix application issues. Gained hands-on experience in full-stack web development, version control, debugging, and delivering real-world software solutions. **Developed Django web applications, designed responsive interfaces, integrated databases, fixed bugs, collaborated with developers, tested features, and maintained project code..**
